

The profile Roloplast 3D 7500 is produced in the firm "Roloplast Skopje" - factory in Negotino, and is constructed and tested in the Belgian firm and laboratory Kaneka.

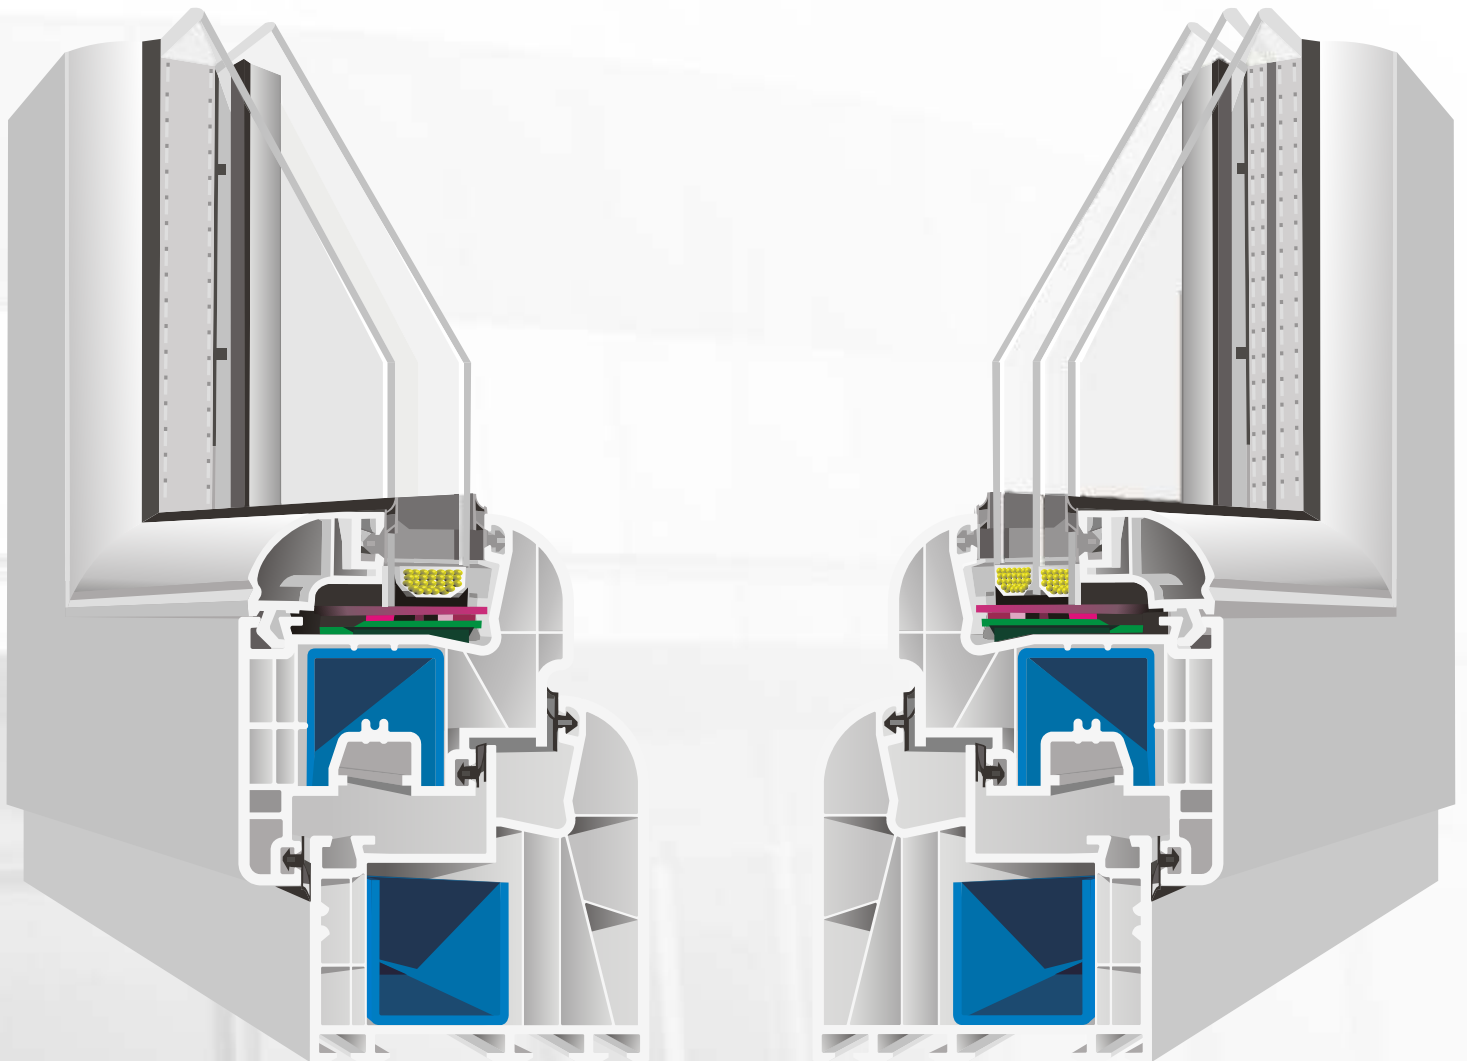

It has both European and our "Certificate of First Class Quality" according to EN 12608 for PVC profiles for doors and windows.

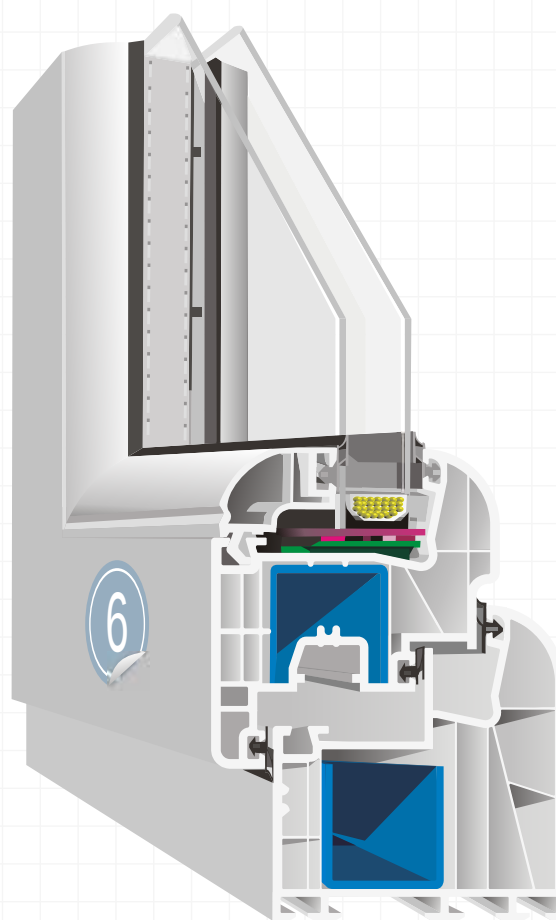

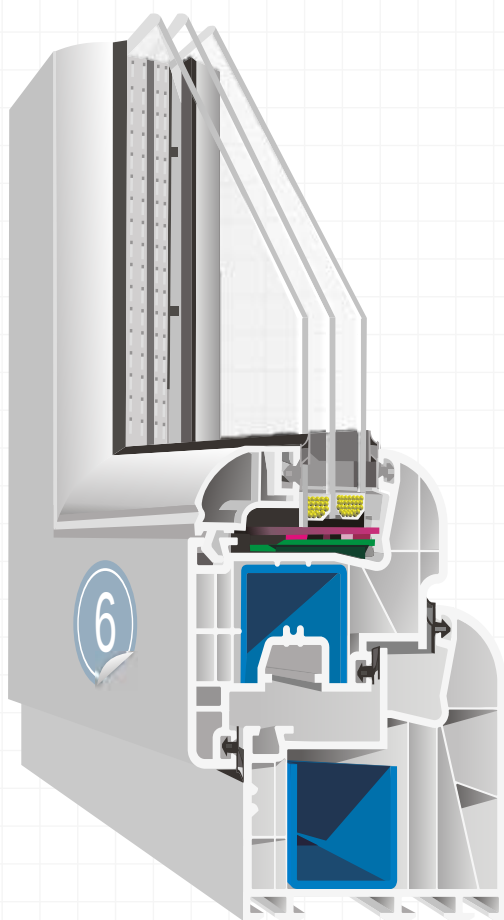

The surface of profile Roloplast 3D 7500 has highest shine and smoothness, and so it greatly rejects both light and heat. The use of high quality materials and substances that do not contain lead, ensure an environmentally and biologically safe profile that meets the standards for a clean and safe environment.

Profile Roloplast 3D 7500 is 6-chambered 75 mm wide. When exposed to drastic weather conditions, temperatures of 40°C and -20°C and acid rains, the profiles Roloplast keeps its original shine and color.

Roloplast company has 40 years of tradition in making PVC profiles and 8 years PVC profiles for windows and doors.

Technical information

1. Standard-Glass Ug 1,1 TPS
2. Half size offset profile for harmonized optic
3. The newest adhesive technology for higher warmth protection
4. 6 - chamber system
5. Steel reinforcement four sided for the best static from 550x550mm
6. Depth of the construction 75mm

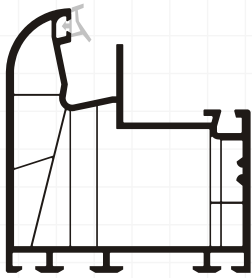

Uw value with insulation glass Ug 0,6 TPS	0.89
Uw value with insulation glass Ug 0,7 TPS	1.05
Uf- value	1.1
Profile chamber	6
Depth of the frame	75mm
Total depth of the construction	92mm
Sealing	3
Guaranty	15 years
Decoration	white
Delivery time	3-4 weeks
